A dense and durable SPC core engineered for excellent strength, dimensional stability, and everyday performance.

Termite Resistant
he mineral-based SPC composition provides no natural food source for termites, supporting long-lasting durability.

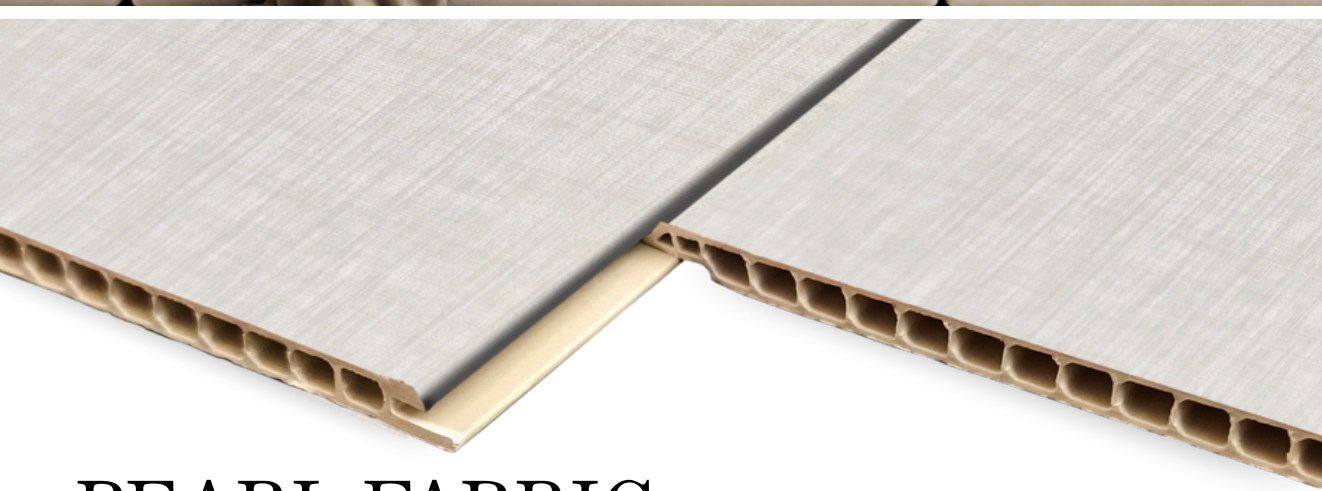

QuickClick System
A precision click-lock system designed for faster installation, secure board connection, and consistent V-groove alignment.

Maison Wall Series — Where Surfaces Become Harmony.

“Maison” means home in French — a place where every side evokes warmth, comfort, and timeless elegance.
Inspired by this very essence, Maison Wall Series is created to elevate walls into refined architectural elements—where texture, depth, and material harmony shape the identity of a space.
Designed to transform vertical surfaces into visual statements, Maison Wall Series brings balance between aesthetics and performance. Each surface is crafted to enrich spatial character, adding dimension, rhythm, and a subtle sense of luxury that complements both modern and timeless interiors.
Engineered for long-term reliability, Maison Wall Series is developed to withstand humidity, deformation, and the demands of everyday use, making it suitable for both residential and commercial environments. Beyond function, every wall solution is thoughtfully composed to enhance ambience—framing spaces with calm sophistication and architectural clarity.

Maison — because a beautiful home is shaped not only by the floor beneath you, but by the walls that surround you.
